The total cost of the tests:  invoice number:    The intended delivery date of the test results:  The intended delivery date of the test results:    The test time and sample amount were approved by the customer according to the form with the code LFO. \$, \$ ``    Decision rules and how to express the conformity of test results:    - The decision rule method according to the customer's request:    - The decision-making rule in the laboratory is carried out by simple rejection and acceptance methods □ band guard □ PC□ and is interpreted as follows.    - case A) Announcing test results without any confirmation or non-confirmation of the test results    -case B) Announcing test results by specifying the range of approval of disapproval of test results and decision rules□    B-`) If the results are within the range of the reference standards that are checked by the customer or the laboratory, the statement "conforms" is mentioned in the report.    B-`) Due to the impact of measured uncertainty, careful analysis is required to determine objective criteria (decision rule). The desire to accept the test results in these cases is high and the results are out of bounds with a part of the measurement uncertainty range, and in these cases, we mention the most appropriate term in the explanation section below the report.    B-`) If the test results are not within the scope of the reference standards that are reviewed by the employer or the laboratory. The phrase does not match is mentioned in the report.										1
